

Where does our lunch come from?

Summer 1

Key Knowledge

- Knowing and locating where some foods come from and why some foods are transported.
- To understand and describe 'food miles' and how transporting foods has an impact on the environment.
- Knowing the journey of some foods from producer to consumer.
- Understanding how production, processing and packaging, as well as transporting, contributes towards 'greenhouse gasses'.
- To understand what trade involves (import and export) and understanding how international trade impacts negatively on poorer countries.
- Understanding what 'Fairtrade' means and how shoppers can make trade more fair.
- Creating a presentation on Power Point to inform and persuade your audience about 'Fairtrade' products.

Key Questions

- What is the journey of some foods from producer to consumer?
- What impact does transporting have on the environment?
- What are the benefits of buying local produce?
- How does production, processing and packaging impact the environment?
- How does international trade negatively impact on poorer countries?
- What does 'Fairtrade' mean?
- Why should we buy 'Fairtrade' products?
