

# Living things and their habitats

Year 2

Science

Summer 2

## What is this topic?

This topic is all about exploring and comparing the differences between things that are living, dead and things that have never been alive. It includes learning all about habitats and which one is best suited to which animal/plant. You will even learn all about how animals obtain their food!

## Key knowledge

- ❖ Different animals need different habitats to survive.
- ❖ Some things have never been alive!
- ❖ A food chain is how animals and plants survive and find their food.
- ❖ Microhabitats are also a type of habitat.

## Key Vocabulary

Habitat	The home or environment of a animal, plant or other organism.
Food Chain	A series of things that depend on the next as a source of food.
Living	Alive and breathing.
Dead	No longer alive or breathing.

## What will I learn?

- ❖ What a habitat is, and which animals are suited to which habitat and why.
- ❖ The difference between living things, dead things and things that have never been alive before.
- ❖ How to explore and compare the things above.
- ❖ How to identify and name a range of different plants and animals and which habitat they need to survive.
